**Integrative Prevention and Treatment of
Breast Cancer**

About the lecture:

Breast cancer is the leading cause of cancer death among women worldwide. Proactive prevention strategies along with integrated treatment offer the opportunity for increased survival and quality of life for people diagnosed with breast cancer. This presentation will explore various evidence-based integrative approaches for breast cancer prevention and treatment. The attendee should gain practical tools for immediate clinical application as well as an appreciation for the biomolecular framework of natural integrative prevention and treatment strategies.
