

Kenneth Bock, MD

Clinical approaches to detoxification in children

About the lecture:

Our children are currently besieged by a number of epidemic disorders, including autism, ADHD, asthma and allergies, which appear related to increasing environmental toxicity acting in concert with genetic predisposition. Therefore, these environmental toxicants, including chemicals and heavy metals make an understanding of clinical approaches to detoxification all the more imperative to restoring and maintaining the health of our children. This lecture will discuss the specific vulnerability of children to toxicity and clinical approaches for detoxification.

About Dr. Bock:

Kenneth A. Bock, MD, FAAFP, FACN, CNS, received his MD with Honors from the University of Rochester School of Medicine in 1979. A pioneer and leader in the field of integrative medicine for over two decades, Dr. Bock's expertise lies in bringing a comprehensive integrative medicine approach to complex medical problems, including the 4-A disorders – autism, ADHD, asthma and allergies. His Healing Program for the 4-A disorders is detailed in his latest book, Healing the New Childhood Epidemics: Autism, ADHD, Asthma and Allergies, which has received international acclaim.
