

Joseph H. Brewer, MD

Tick-borne co-infections and chronic illness

About the lecture:

Dr. Brewer will review and discuss the tick transmitted co-infections that are frequently found in association with Lyme disease. The discussion will include Babesia, Bartonella and Ehrlichia. He will also briefly discuss XMRV (a new virus associated with chronic fatigue syndrome).

About Dr. Brewer:

Dr. Brewer has been in private practice in Infectious diseases since 1980. Director of Infectious Diseases and Infection Control at St. Luke's Hospital, Kansas City, MO. Special interests in chronic infections including HIV, Lyme disease and chronic fatigue syndrome.
