

Joseph J. Burrascano, MD

Tick-borne diseases update

About the lecture:

Latest information concerning this complex mix of infectious diseases and multi-system dysregulations will be discussed, with emphasis on the clinical approach to the chronically ill patient

About Dr. Burrascano:

Dr. Burrascano is a well recognized specialist in the diagnosis and treatment of Lyme and associated complex infectious diseases, and the chronic illnesses that accompany them. With over two decades of experience and research in this field, he has appeared in and on virtually every form of media, has advised the CDC and NIH, testified before the U.S. Senate, an armed services joint subcommittee, and at various governor's councils. His current focus revolves around his newly completed project, "The Lyme and Associated Diseases RegistryTM". The goal of this copyrighted Registry is to follow each selected patient from the beginning to the end of their illness, to try to divine out what the various symptoms mean, which tests are worthwhile, to identify the medications and treatments that have the highest likelihood of curing the illness, and to uncover any possible drawbacks to our treatments.
